## Overview

The Body Worn Camera VM780 is tailored to capture, store, and share video, audio, and image evidence in the field. It integrates a body camera with a remote speaker microphone, and allows you to perform video dispatch and command over 3G/4G/Wi-Fi, make voice communication, and initiate an emergency alarm in the mission critical conditions.

### On-site Real-time Video Streaming

With 3G/4G/Wi-Fi, VM780 can transmit the on-site real-time video back to the command & dispatching center, to let the dispatcher see how events are actually unfolding in the field.

### Audio Group Call

With the dispatcher involved, VM780 can initiate one-to-one and one-to-many calls with other VM780s over 3G/4G/Wi-Fi. The instant communication can greatly enhance the work efficiency.

### High Efficient Video Compression

VM780 supports H.265 video compression technology, which requires much narrower network bandwidth for real time HD video transmission than that of H.264.

### High Capacity Battery

Equipped with a 3500mAh battery, VM780 can provide more than 9 hours battery life for continuous video shooting with 720P@30FPS. Besides, extra battery replacement is supported.

### 216° HD Rotatable Camera

The lens of VM780 can be rotated vertically by 216°, which can provide optimal angle of view and flexible wearing positions for users to capture critical events.

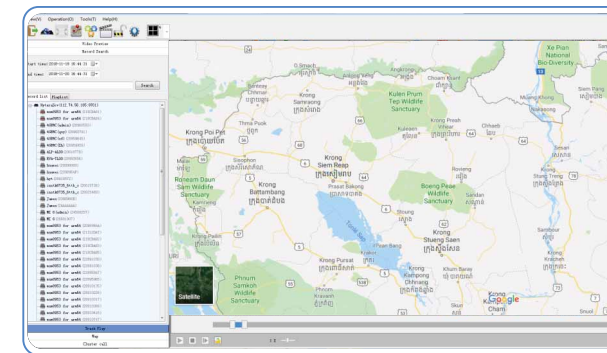

### Advanced Data Encryption

VM780 adopts the AES256 advanced encryption technology to protect all the captured evidence (including images, audio, and videos) in local storage or during transmission.

## Real-time Video Transfer & Centralized Evidence Management Solution
